August 2025

Introduction and Content

This document:

- Presents maps and population information for current Wirral Neighbourhood boundaries
- Provides an overview of the current configuration of Primary Care Networks (PCNs) and Service Delivery Units (SDUs) in Wirral
- Presents maps showing the geographic distribution of GP Practices by PCNs and SDUs across Wirral and within each Wirral Neighbourhood (slides 7-9)
- Provides an overview of the distribution of registered patients by GP Practice and PCN/SDU (Slides 10-17)
- Highlights the non-geographic nature of PCN/SDU's and shows how it is therefore difficult to align PCNs and SDUs to Neighbourhoods
- Is based on latest data available from Cheshire and Merseyside ICB Business Intelligence team (August 2025)

Wirral Neighbourhoods

Neighbourhoods are distinct geographic boundaries that can be clearly defined on a map.

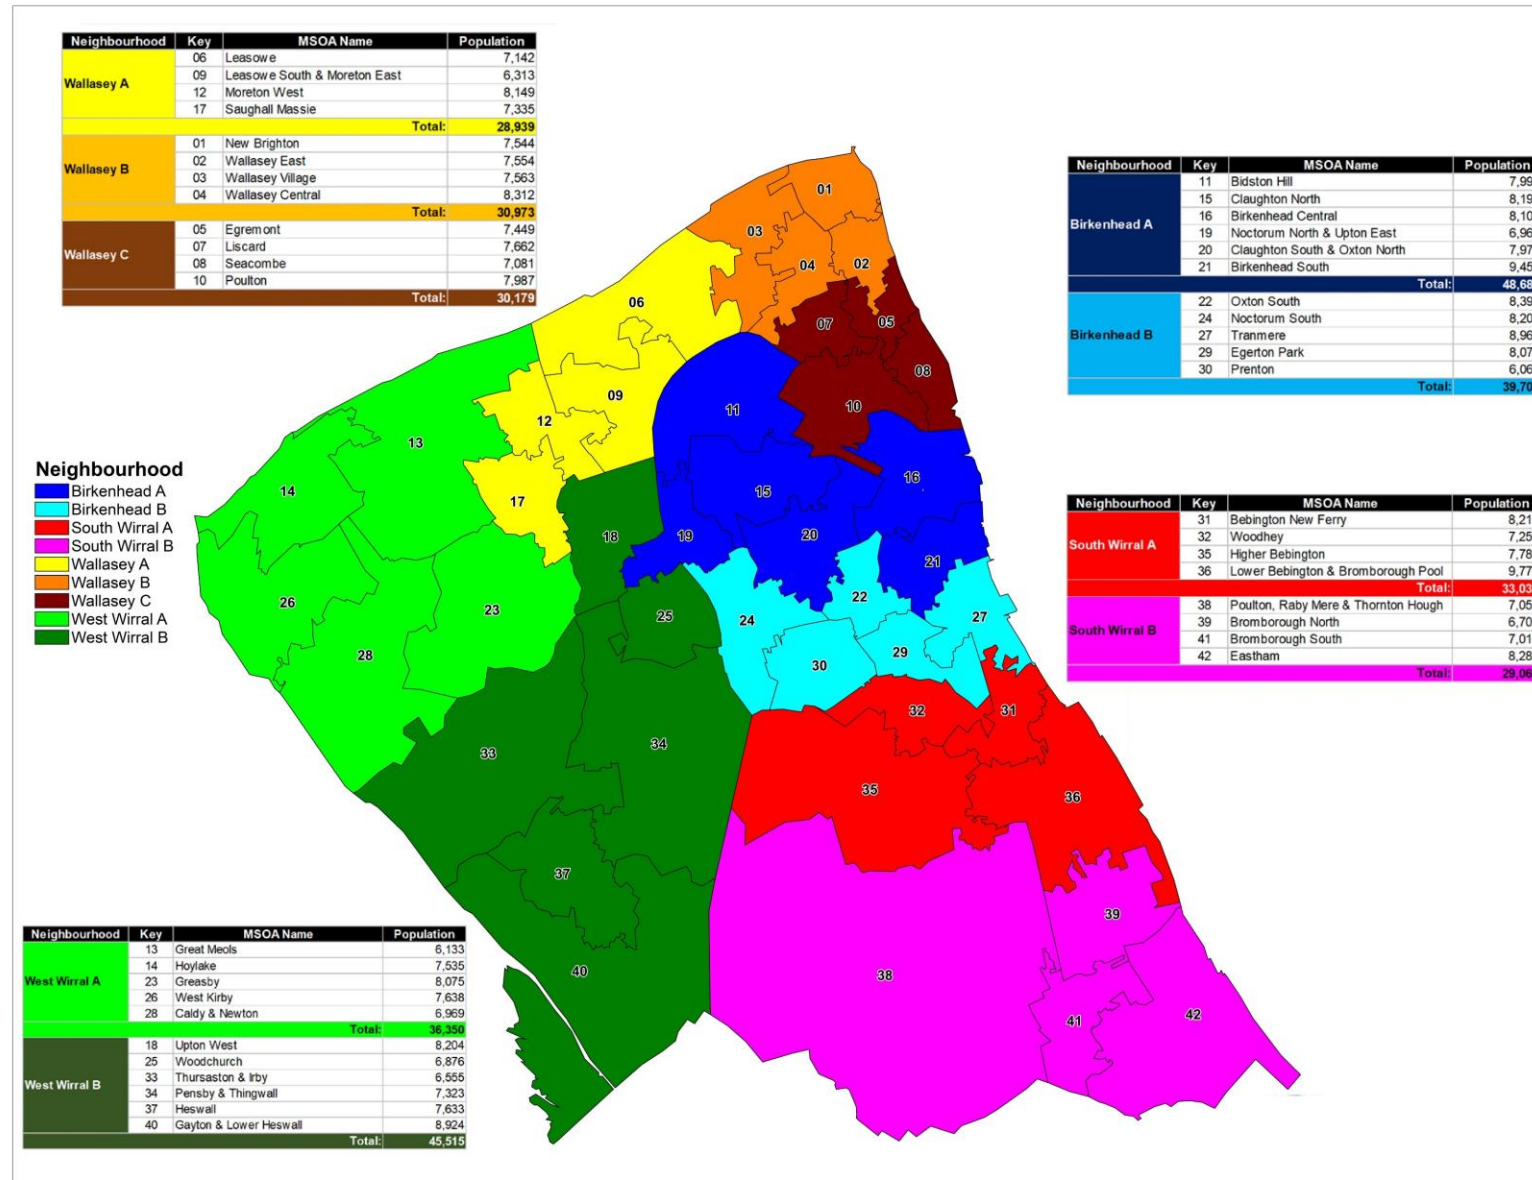

There are 9 neighbourhoods in Wirral, made up from Middle Layer Super Output Areas (MSOAs). All 9 neighbourhood boundaries are distinct from each other and do not overlap. The current neighbourhood boundaries were defined using statistical methods incorporating population and deprivation demographic information to create areas that within themselves are similar but distinct to other neighbourhoods

As Neighbourhood boundaries are created from MSOAs, any data available at a geographic level (ONS population data, Census data, IMD data, mortality rates etc.) can be aggregated to Neighbourhood areas to create comprehensive Neighbourhood health and wellbeing information profiles.

The 9 Neighbourhoods in Wirral are listed below and Map on following page:

- **Birkenhead A:** Total population of 48,687
- **Birkenhead B:** Total population of 39,705
- **South Wirral A:** Total population of 33,031
- **South Wirral B:** Total population of 29,060
- **Wallasey A:** Total population of 28,939
- **Wallasey B:** Total population of 30,973
- **Wallasey C:** Total population of 30,179
- **West Wirral A:** Total population of 36,350
- **West Wirral B:** Total population of 45,515

Wirral Neighbourhoods – MSOA boundaries and Population Map

Primary Care Networks (PCNs) and Service Delivery Units (SDUs)

A PCN is a group of GP Practices working closely together to provide integrated services to their registered population. Within Wirral, some PCNs operate as one Service Delivery Unit, others are sub-divided into 2 or 3 SDUs. Analysis and information presented in this document is at SDU level.

The population base for an SDU is the GP registered population. GP Catchments area can be quite wide and because a GP practice is located within a certain area does not mean that all the registered patients will be from that area. Some Wirral GP registered patients may even live outside Wirral, and 2 people living on the same street may be registered with 2 different GP Practices in 2 different SDUs. Information presented in this document demonstrates this and illustrates why it is not possible to create a geographic boundary to describe or define an SDU and highlights the complexity of 'aligning' SDUs to Neighbourhoods.

The 6 PCNs (with 2 PCNs consisting of 2 SDUs):

- **Arno Primary Care Alliance SDU (part of Birkenhead PCN):** 9 practices with a total population of 48,506
- **Brighter Birkenhead SDU (part of Birkenhead PCN):** 6 practices with a total population of 50,292
- **Healthier Neighbourhoods PCN:** 3 practices with a total population of 30,437
- **Healthier South Wirral PCN:** 5 practices with a total population of 50,192
- **Healthier West Wirral PCN:** 5 practices with a total population of 68,294
- **Moreton and Meols PCN:** 4 practices with a total population of 31,690
- **North Coast Alliance SDU (part of Wallasey PCN):** 7 practices with a total population of 41,068
- **Wallasey Wellbeing SDU (part of Wallasey PCN):** : 4 practices with a total population of 25,956

Summary Overview of Neighbourhoods and PCN/SDUs

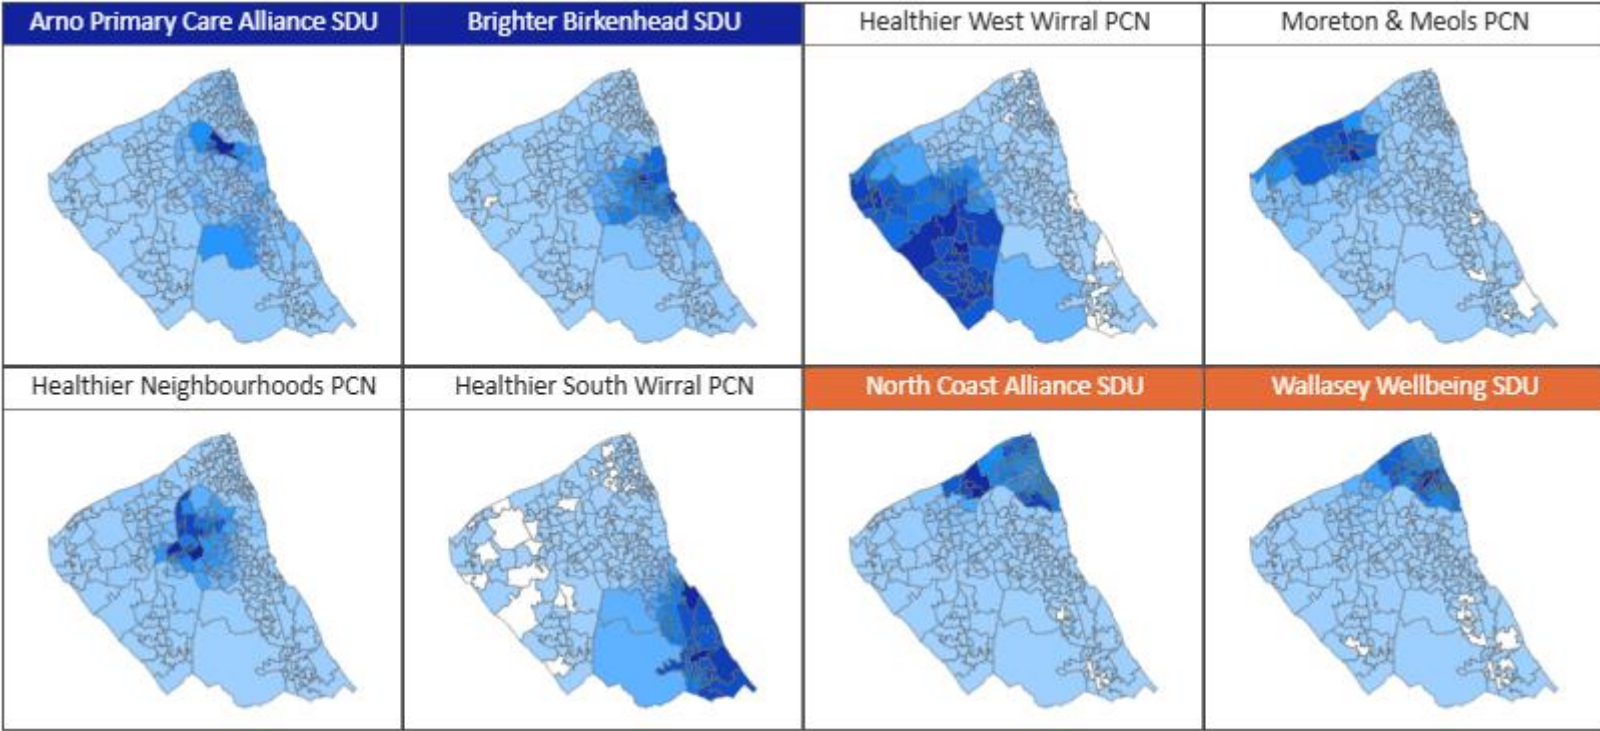

Neighbourhoods (Resident ‘Place-based’ population)		Service Delivery Units (GP Registered Base)
Composition	Neighbourhoods are geographical boundaries made up from Middle Layer Super Output Areas (MSOAs), they are not aligned to GP practices.	PCN/SDUs are made up from groups of GP practices within Wirral, they are not geographic boundaries.
Population	Neighbourhood populations calculated from ONS population estimates, the most recent estimates for 2022 shows a total population of 322,439	PCN/SDU populations are calculated using GP registered population figures. Latest figures for July 2025 shows a total population of 346,435
Boundary Limits	Individual neighbourhoods are confined to a distinct geographical boundary and populations do not overlap with other neighbourhoods.	PCN/SDUs populations are not confined to a specific geographical boundary and registered patients can live anywhere inside or outside of Wirral.
Demographics	Population characteristics such as deprivation and age structure can vary significantly between the most deprived neighbourhood and the least deprived neighbourhood.	Population characteristics such as deprivation and age structure vary less significantly between SDUs because there can be varied registered population bases at each GP practice that makes up an SDU.

Summary - Service Delivery Unit Boundaries

Complexity and non suitability of creating SDU geographic boundaries

Defining geographical boundaries for Primary Care Networks (PCNs) and Service Delivery Units (SDUs) is not feasible because of the overlapping catchment areas of GP Practices. Defining the perimeter of a PCN/SDU boundary based on its GP registered population and where these patients live will often show a boundary that encompasses the whole of Wirral. The maps below show the distribution of the registered population of each of the 6 PCNs (with 2 PCNs consisting of 2 SDUs). The blue shading shows areas of Wirral where a PCN/SDU has at least 1 patient. Darker areas have greater concentration of patients.

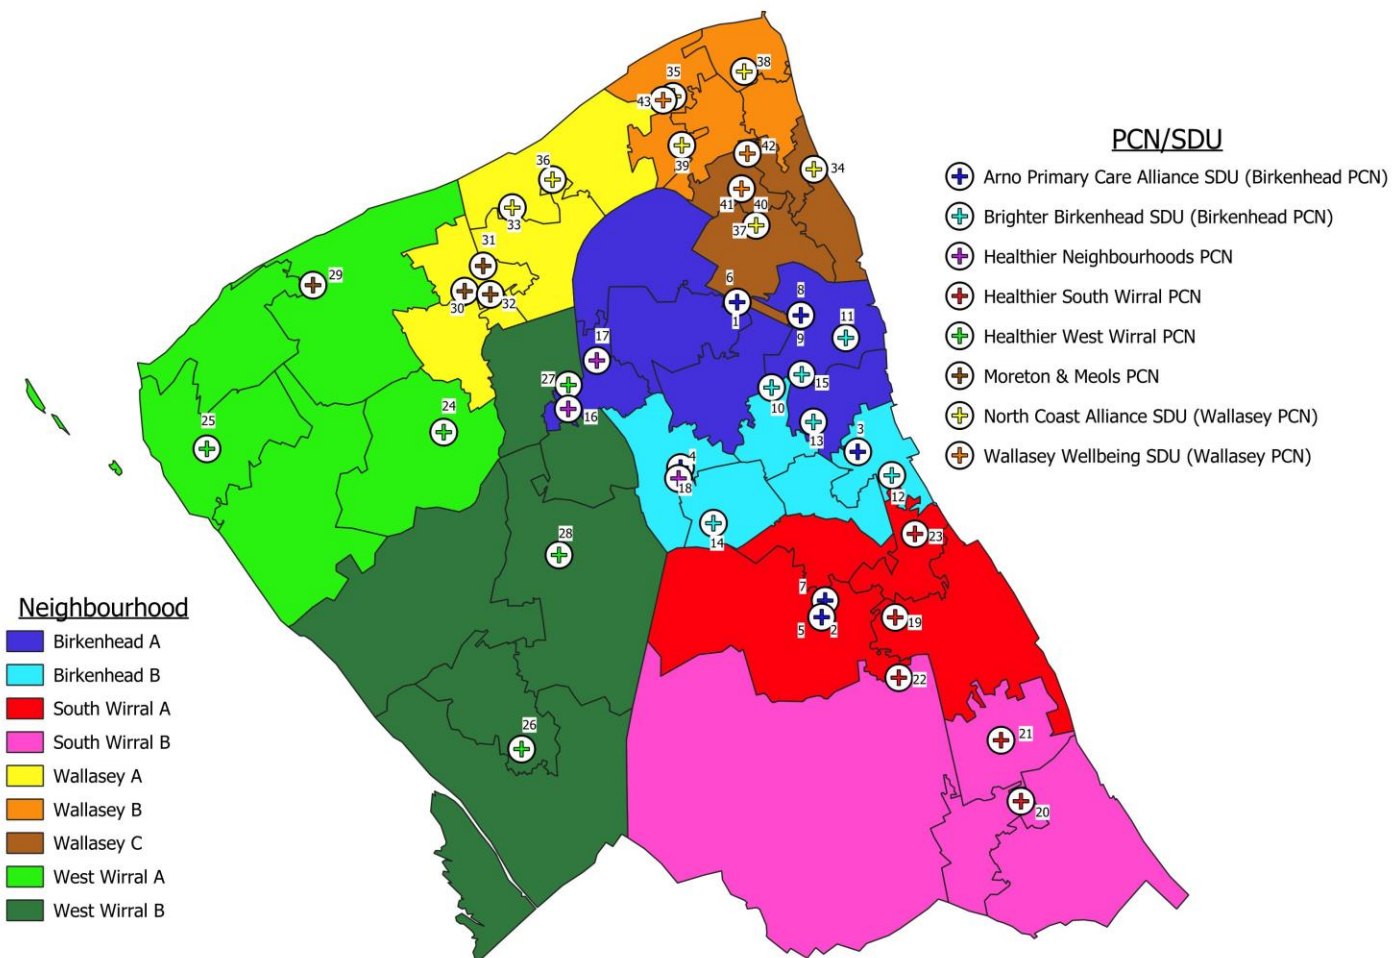

Birkenhead PCN
2 SDUs highlighted in blue

Wallasey PCN
2 SDUs highlighted in orange

Wirral Overview – PCN/SDUs overlaid on Neighbourhoods - Summary

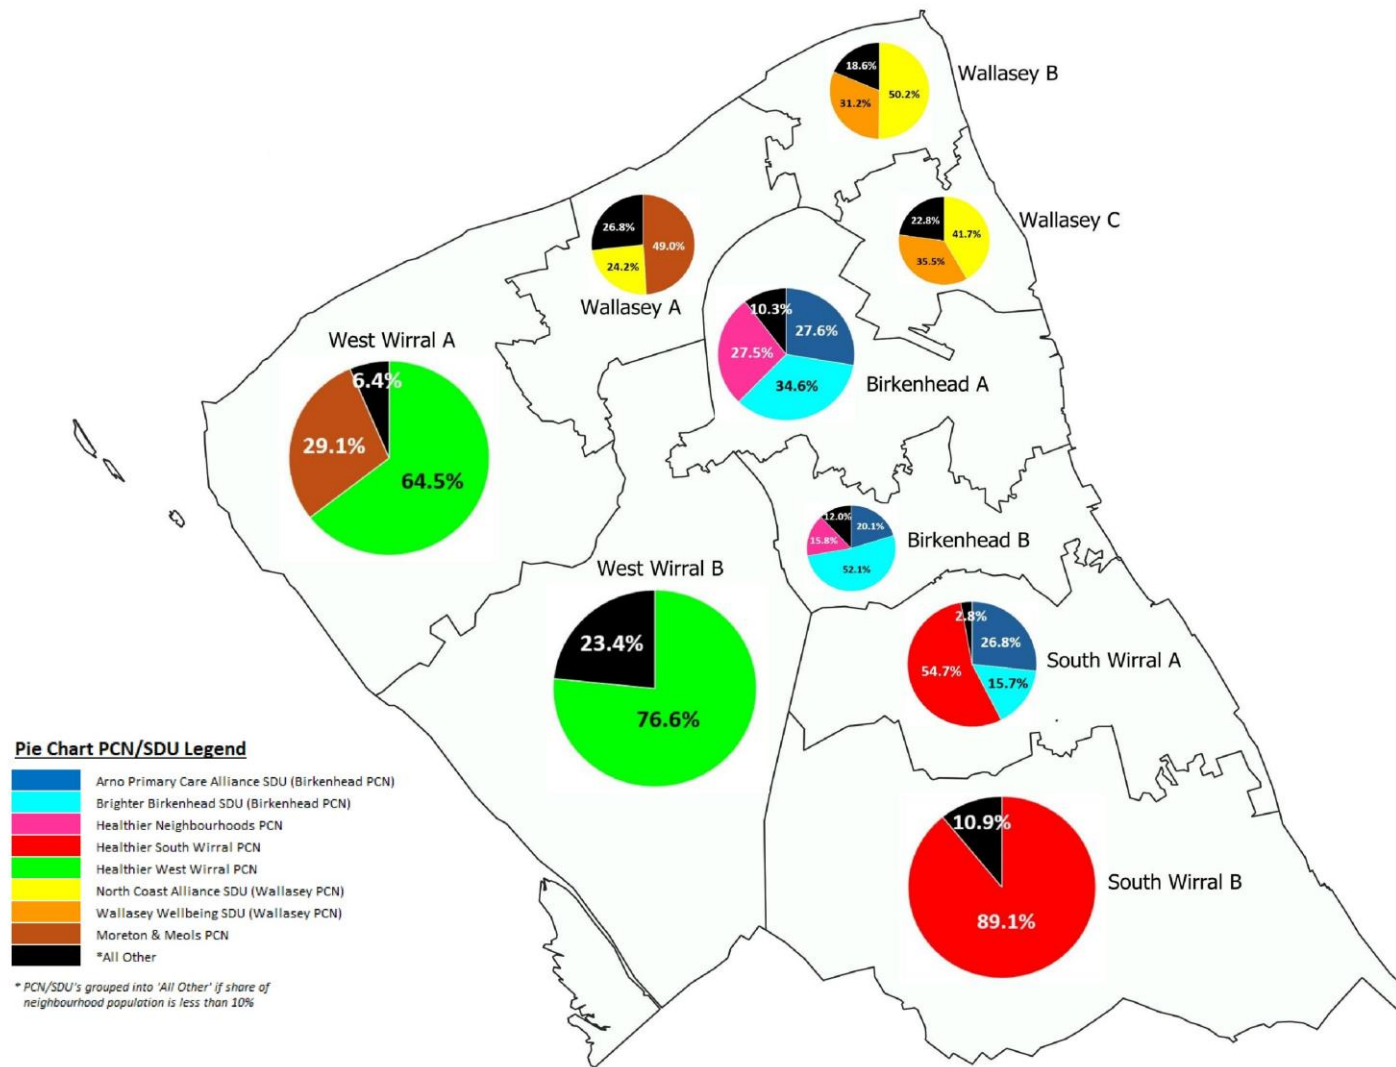

Service Delivery Units (SDUs) to Neighbourhood

- All 8 SDUs have practices located in at least 2 separate neighbourhoods
- Arno Primary Care Alliance has 9 GP practices located across 4 different neighbourhoods
- North Coast Alliance has 7 GP practices located across all 3 neighbourhoods of Wallasey A, B and C
- All other SDU's are located across 2 separate neighbourhoods

Neighbourhoods to Service Delivery Units (SDUs)

- All 9 Neighbourhoods have at least 1 GP Practice/SDU located within their boundary
- South Wirral B and West Wirral B each have Practices from only 1 SDU located within side their respective boundaries. However, those SDUs do not exclusively cover those neighbourhoods, and each have Practices located within other neighbourhood areas too.
- All other neighbourhoods have at least 2 SDUs located within their boundary

Wirral Overview – Neighbourhood Boundaries with PCN/SDU population pie charts

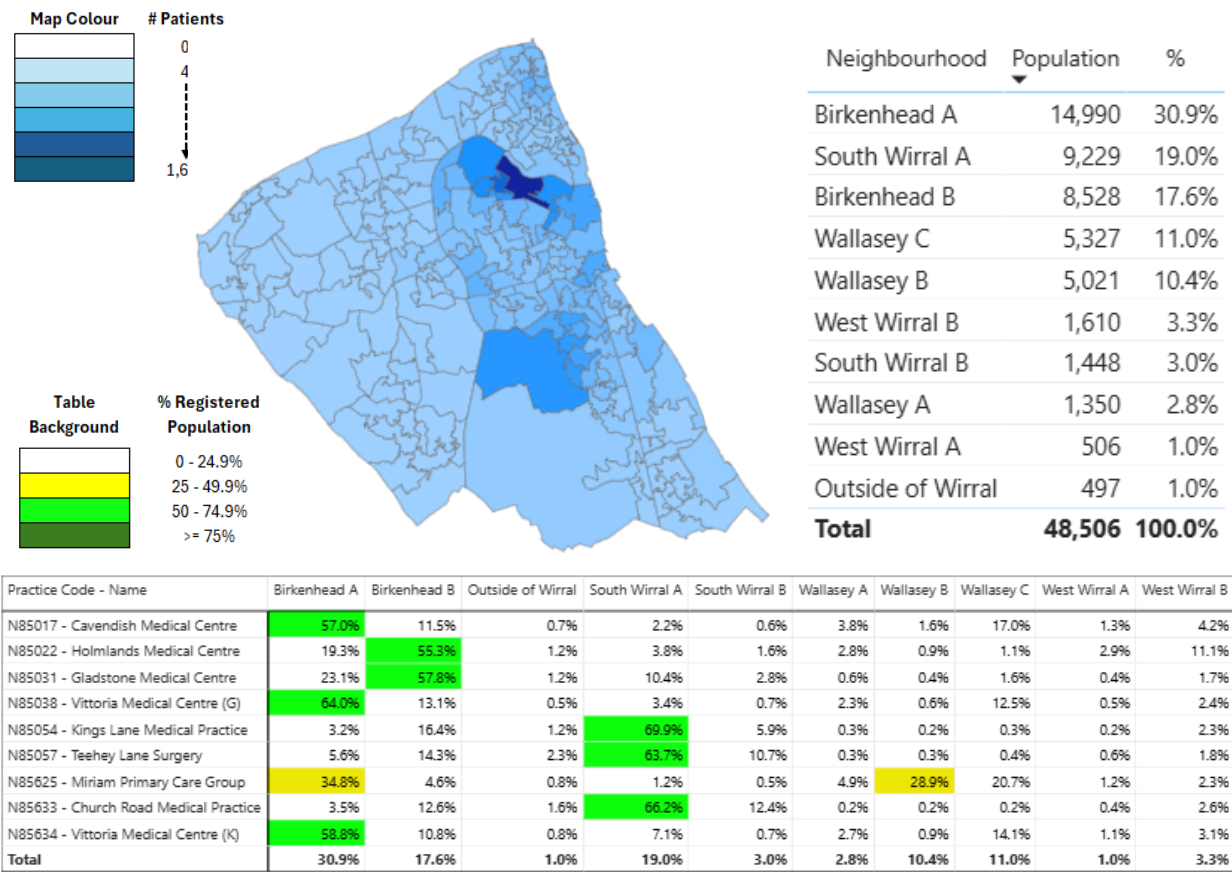

Neighbourhoods to PCN/SDU

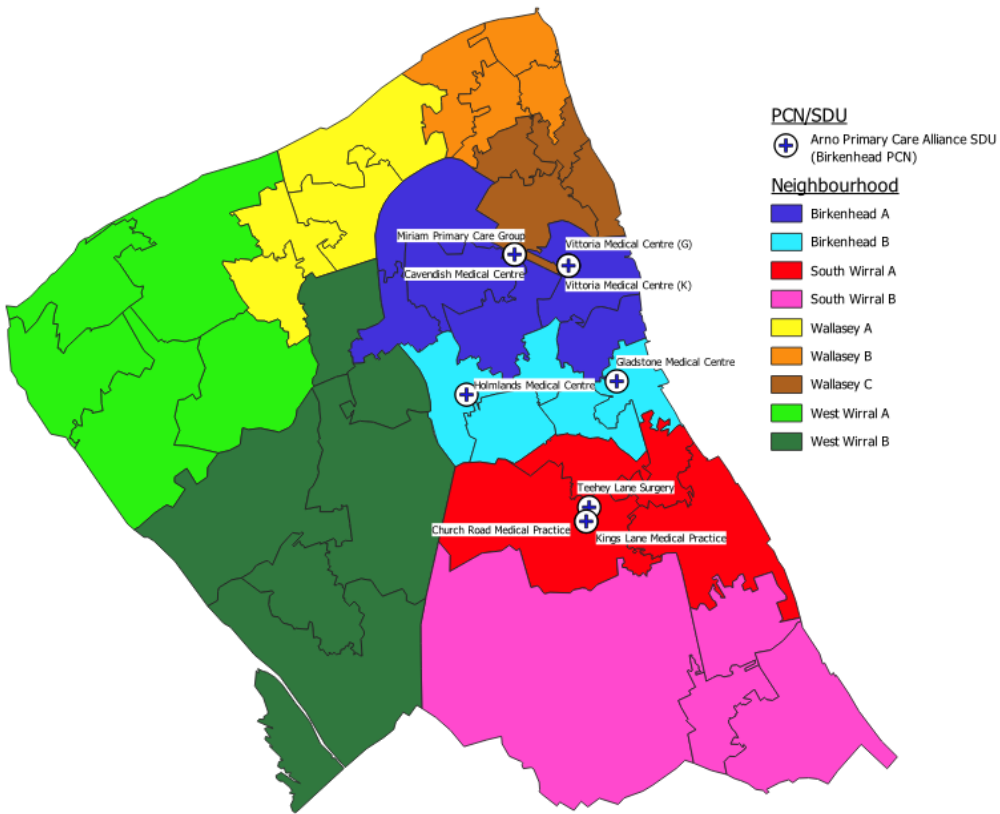

- Each Neighbourhood has patients that are registered with at least 3 different PCN/SDUs
- South Wirral B, West Wirral A and West Wirral B have more than two thirds of their populations registered at 1 PCN/SDU
- Wallasey A, B and C have populations that are mostly registered at North Coast Alliance SDU (Wallasey PCN), Wallasey Wellbeing SDU (Wallasey PCN) and Moreton & Meols PCN
- Birkenhead A has a population mostly registered at Arno Primary Care Alliance SDU (Birkenhead PCN), Brighter Birkenhead SDU (Birkenhead PCN) and Healthier Neighbourhood PCN with the biggest single share being Brighter Birkenhead SDU (Birkenhead PCN) making up 34.6% of the population
- South Wirral A has 54.7% of it's population registered with Healthier South Wirral PCN with the remaining 42.5% made up of patients registered at Arno Primary Care Alliance SDU (Birkenhead PCN), Brighter Birkenhead SDU (Birkenhead PCN) and a further 2.8% registered at all other PCN/SDUs

Arno Primary Care Alliance SDU (Birkenhead PCN)

Population Coverage

Geographical Setting

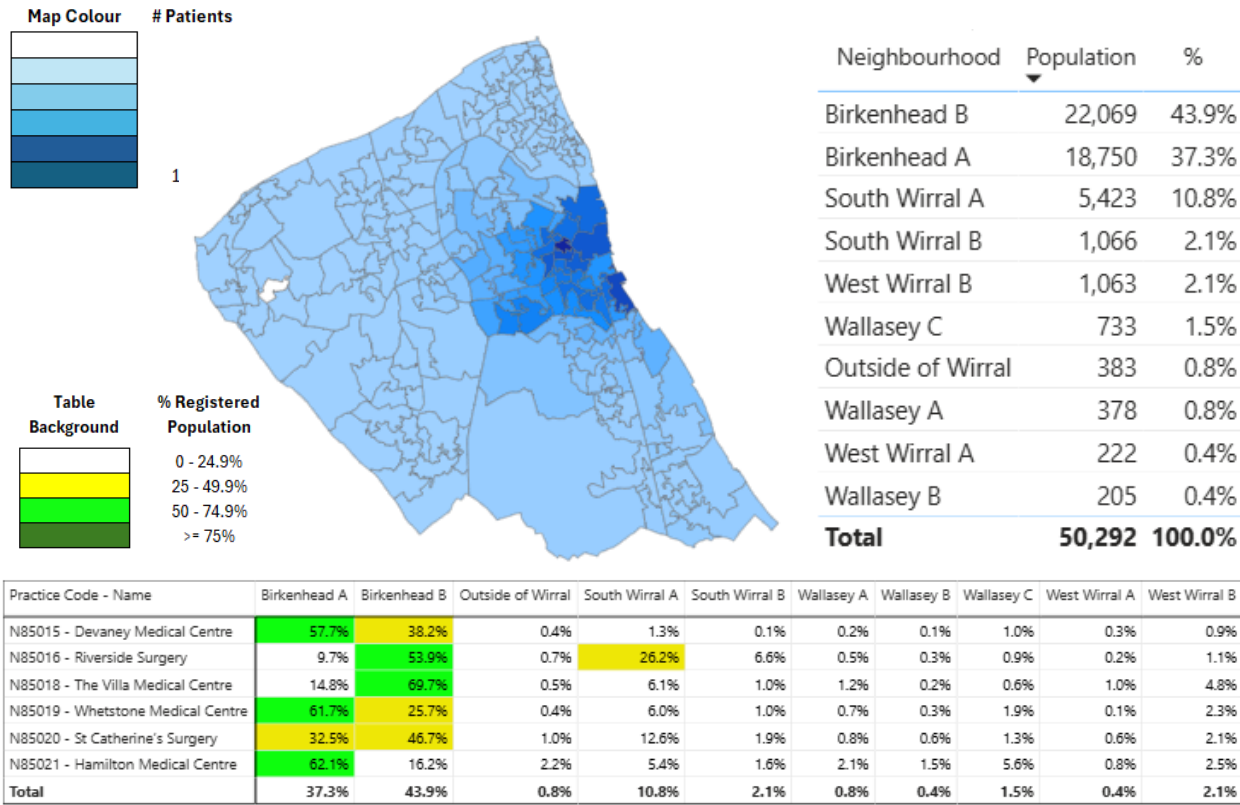

Arno Primary Care Alliance has a total registered population of 48,506 spread across all areas within Wirral, 23,518 (48.5%) live in Birkenhead A and B neighbourhoods, 11,698 (24.2%) live in Wallasey A, B and C neighbourhoods, 10,677 (22.0%) live in South Wirral A and B neighbourhood and 2,613 (5.3%) live in either West Wirral A and B neighbourhoods or outside of the Wirral. Individual practices within Arno Primary Care Alliance have registered populations who live across the whole of Wirral with not 1 practice having more than 75% of their registered population living within a single neighbourhood.

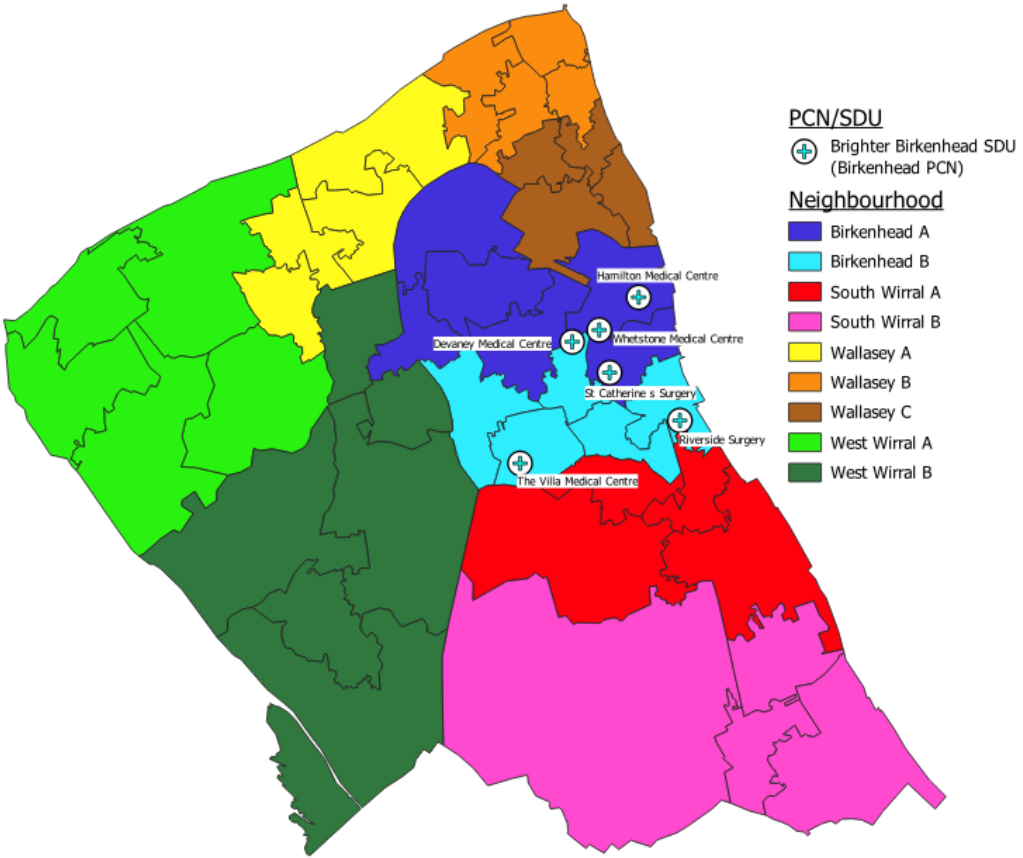

Arno Primary Care Alliance has 9 practices in total, located geographically across 4 neighbourhoods in Wirral, Miriam Primary Care Group Practice and Cavendish Medical centre are located in Wallasey C neighbourhood, both Vittoria Medical Centres (K & G) are located in Birkenhead A neighbourhood, Holmlands Medical Centre and Gladstone Medical Centre are located in Birkenhead B neighbourhood and Teehey Lane Surgery, Church Road Medical Practice and Kings Lane Medical Practice are located in South Wirral A neighbourhood

Brighter Birkenhead SDU (Birkenhead PCN)

Population Coverage

Geographical Setting

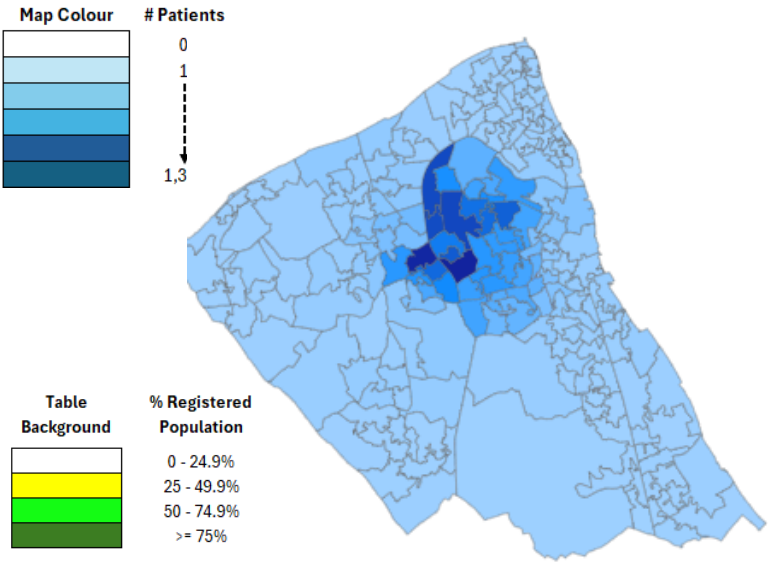

Brighter Birkenhead has a total registered population of 50,292 spread across almost all areas within Wirral, 40,819 (81.2%) live in Birkenhead A and B neighbourhoods, 6,489 (12.9%) live in South Wirral A and B neighbourhood and 2,984 (5.9%) live in all other neighbourhoods or outside of the Wirral. Individual practices within Brighter Birkenhead show similar patterns of having the majority of their registered population living in Birkenhead A and B neighbourhoods however not 1 practice has more than 75% of their registered population living within 1 single neighbourhood.

Brighter Birkenhead has 6 practices in total located geographically across the 2 neighbourhoods of Birkenhead A and B, Hamilton Medical Centre, Whetstone Medical Centre, Devaney Medical Centre and St Catherine's Surgery are located in Birkenhead A neighbourhood, The Village Medical Centre and Riverside Surgery are located in Birkenhead B neighbourhood.
