

# The weekly Coronavirus (COVID-19) surveillance report for Wirral

Week ending: Friday 9th July 2021

cumulative data from:

**30 January 2020 to 09 July 2021** in **WIRRAL**

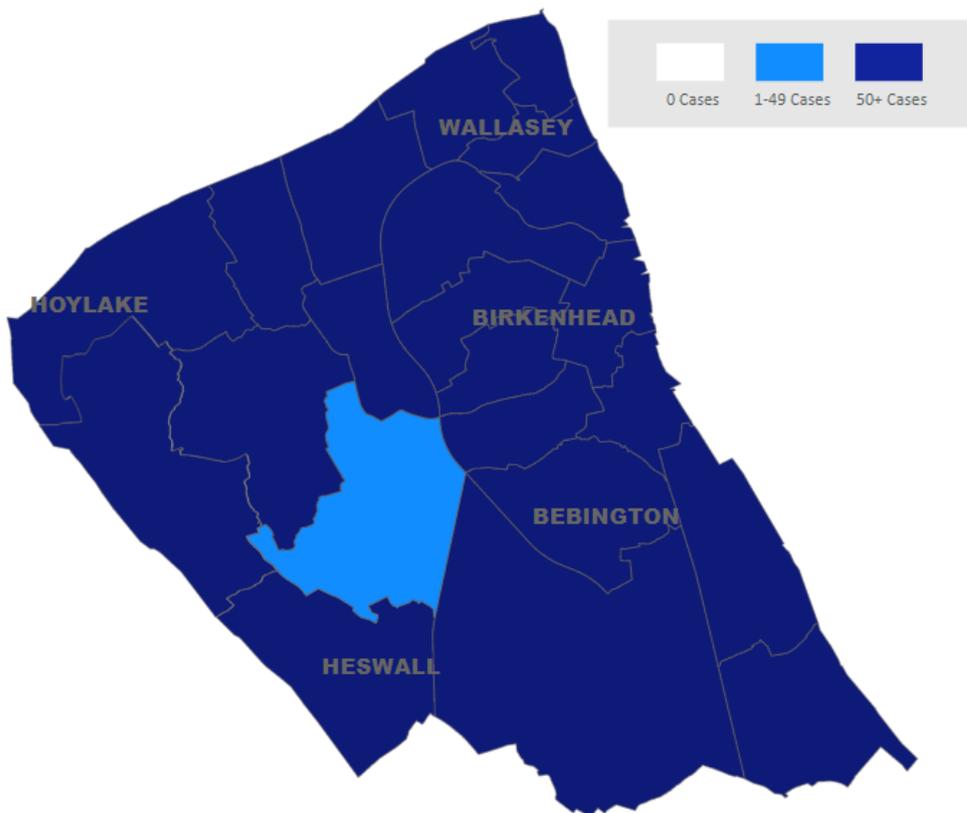

|                                     |                                      |  |
|-------------------------------------|--------------------------------------|--|
| cumulative number of COVID-19 cases | cumulative tests per 100K population | cumulative number of registered COVID-19 deaths to 2 <sup>nd</sup> July  |
| <b>29,076</b>                       | <b>364,612</b>                       | <b>970</b>   |
| number of COVID-19 cases this week  | tests per 100K population this week  | number of COVID-19 deaths registered this week (to 2 <sup>nd</sup> July) |
| <b>1,686</b>                        | <b>14,272</b>                        | <b>0</b>   |

**LATEST 7-DAY POSITIVITY OF COVID-19 TESTS**

**11.0%**

**7-DAY CONFIRMED COVID-19 INFECTION RATES<sup>1</sup>**

**Confirmed Cases by Wirral Ward\*  
(7-days to 09/07/21)**

|                    |   |
|--------------------|---|
| Wirral             | <b>507.1/100,000</b><br>infection rate <sup>1</sup> |
| Merseyside         | <b>477.9/100,000</b><br>infection rate <sup>1</sup> |
| North-West         | <b>435.5/100,000</b><br>infection rate <sup>1</sup> |
| England            | <b>321.3/100,000</b><br>infection rate <sup>1</sup> |
| National Rank      | 24th <sup>2</sup>                                   |
| Previous Week Rank | 29th <sup>2</sup>                                   |

\*Note: Based on 47-106 cases per ward

<sup>1</sup>infection (incidence) rate - the cumulative number of confirmed cases of COVID-19 for the 7-day period divided by the total population of each area multiplied by 100,000

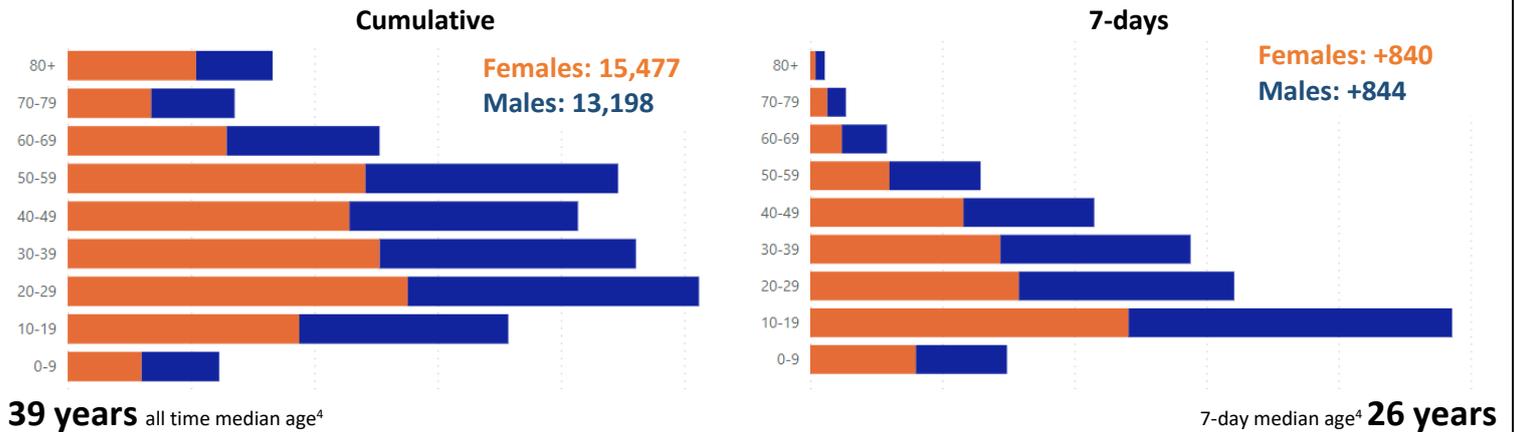

<sup>2</sup>A rank of the rate of COVID-19 per 100,000 by local authority. There are 309 local authorities in England (as at 14/04/21). A decrease in rank does not necessarily mean our rate is decreasing, rather, other areas rates could be increasing at a greater speed.

For more information, including ward figures, see [Daily COVID-19 reports](#)

# The weekly Coronavirus (COVID-19) surveillance report for Wirral

Week ending: Friday 9th July 2021

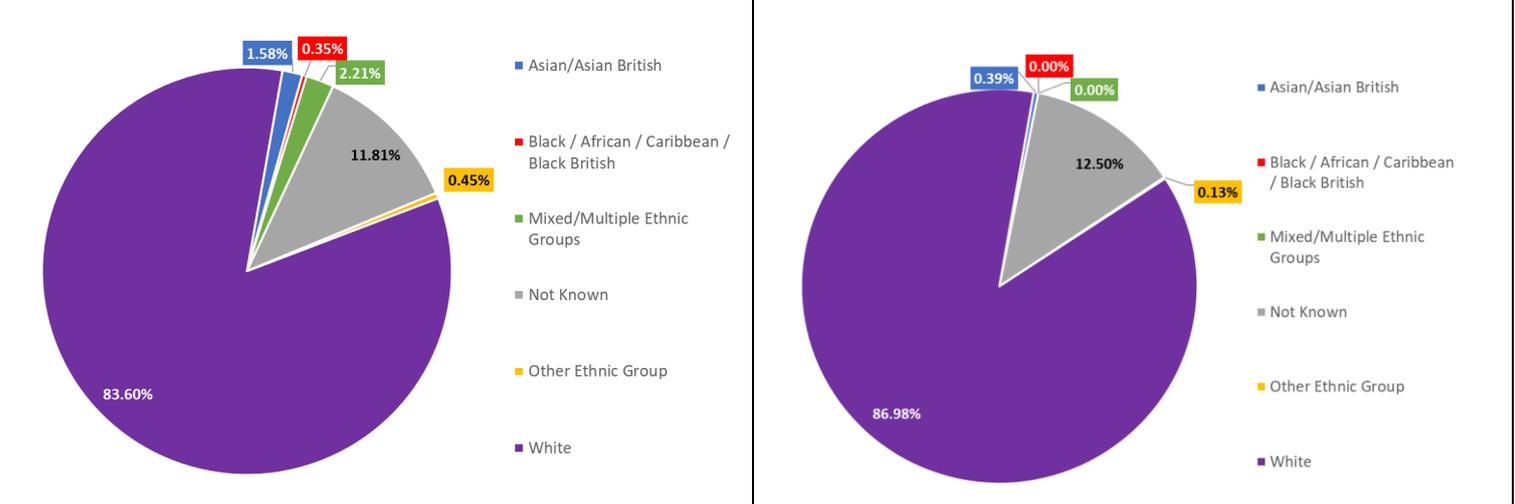

## CONFIRMED COVID-19 CASES BY AGE AND GENDER

<sup>4</sup>median age is the middle value in a range - half of the cases are younger than this age and half are older (all persons)  
**Note:** Some case records do not currently have full age and/or gender details and are therefore not included in the above chart; therefore, figures will not sum to headline totals

## ETHNICITY OF CONFIRMED COVID-19 CASES

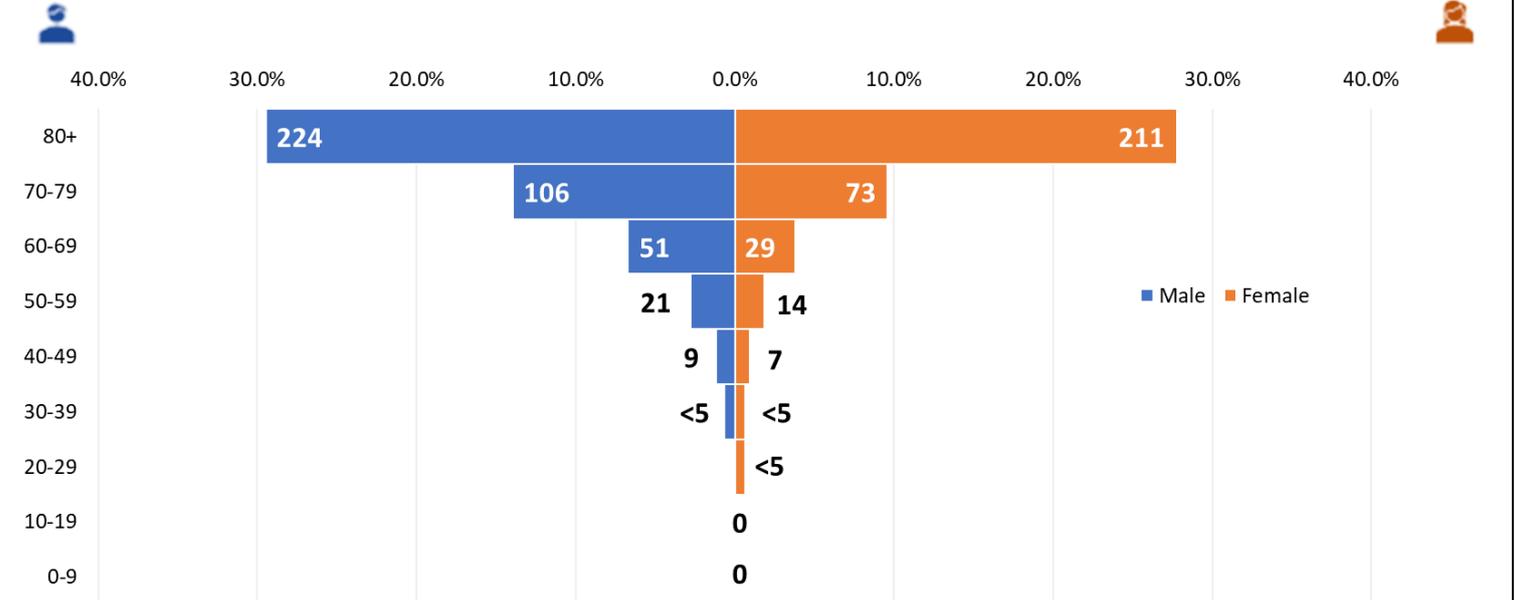

## ETHNICITY OF COVID-19 DEATHS

**Note:** These data sets are analysed using the cumulative confirmed cases and COVID-19 related deaths in Wirral

## COVID-19 RELATED MORTALITY

cumulative number of COVID-19 related deaths in Wirral

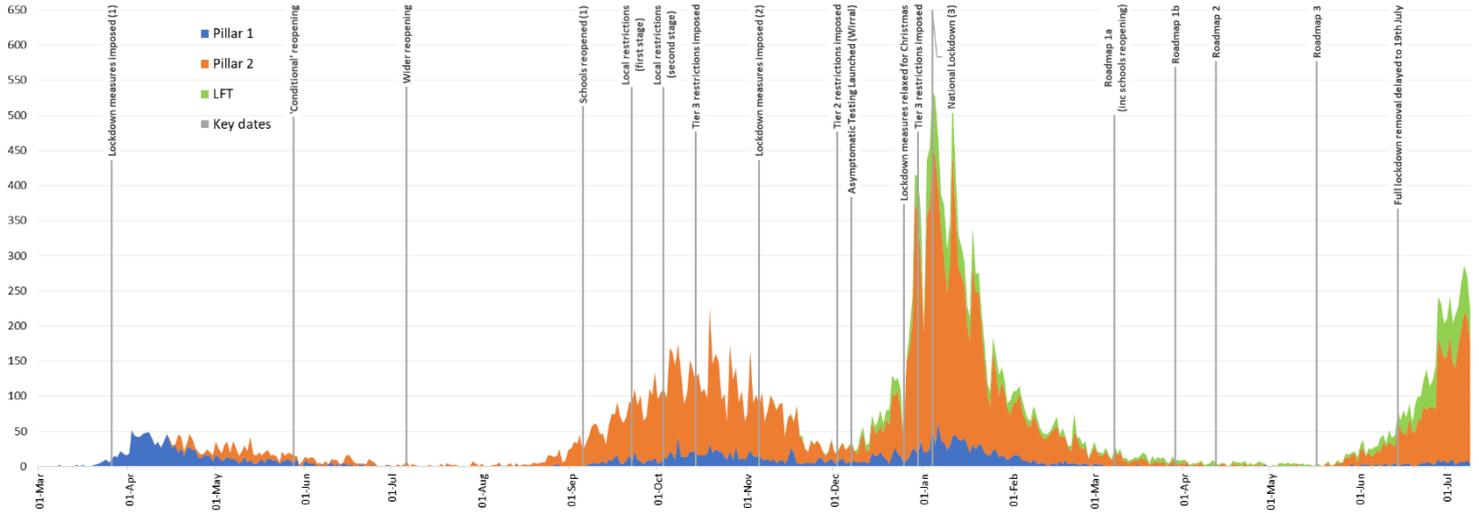

**Note:** The above data has followed the methodology of the PHE indicator for 'Deaths within 28 days of a positive COVID-19 test' since reporting for week ending 30<sup>th</sup> October and is therefore not comparable to reports prior to that week. The figures are still derived using a local live data source and so will therefore not exactly match the number of deaths officially reported by the Office for National Statistics or the PHE Coronavirus Tracker. Further validation of the external data sources with fully coded dates has now led to changes in the numbers reported. Some records do not currently have full age and/or gender details and are therefore not included in the above chart; therefore, figures will not sum to headline totals. Cases are subject to retrospective review and may be reallocated to other Local Authorities.

Week ending: Friday 9th July 2021

## EPIDEMIC CURVE

number of positive cases by Pillar 1 and Pillar 2 testing<sup>5</sup>

<sup>5</sup>The most recent week is a partial week and only data from more than five days ago can be considered complete

The data are shown by the date the specimen was taken

Pillar 1 data is for swab testing in PHE labs and NHS hospitals for those with a clinical need as well as staff

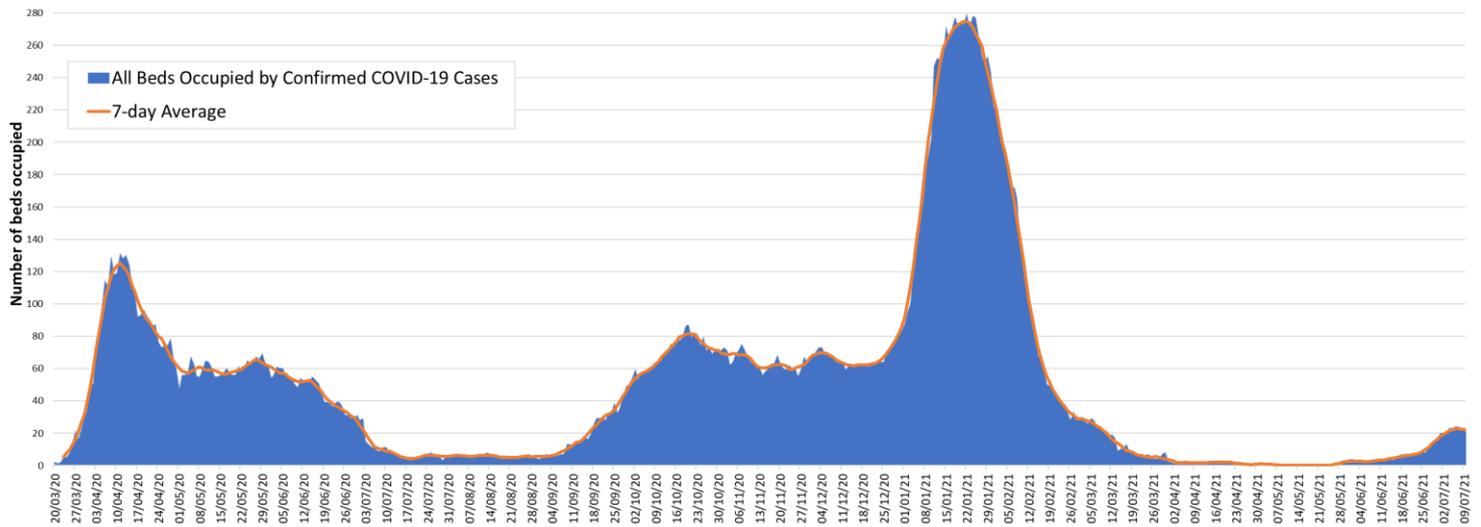

Pillar 2 data is for swab testing for the wider population, as set out in government guidance

LFT (lateral flow device) data is for rapid tests in the community (which also make up part of Pillar 2 testing)

Details around the government roadmap can be found here: <https://www.gov.uk/government/publications/covid-19-response-spring-2021/covid-19-response-spring-2021-summary>

## HOSPITALISED COVID-19 CASES

Number of beds occupied by confirmed COVID-19 patients by bed type  
(Wirral University Teaching Hospital (WUTH) NHS Foundation Trust)

**Note:** The peak of WUTH beds occupied by patients with COVID-19 is 279 (January 2021). This surpassed the previous peak of 131 (April 2020)
